

The BGI Backflow Preventer Test Kit

The Buffalo Gauge Backflow Preventer Test Kit is a compact portable testing device made for testing all reduced pressure zone backflow prevention assemblies, double check and PVB valve assemblies.

The BGI Backflow Preventer Test Kit is ready to use out of the box, with a NIST traceable certification, rugged foam lined carrying case, and adaptors.

Re-Calibration Recall Service Included!

Best of all, BGI will monitor your calibration cycle, and give you notice 60 days in advance of the calibration being due, to keep you in compliance with State and local regulations!

FREE!
Certification
Of Calibration
Good For 1 year

Each Buffalo Gauge Backflow Preventer Test kit comes with a certification of calibration traceable to N.I.S.T., and a certification sticker on the gauge with expiration date.
